

Symposium Schedule

7:30 Registration / Continental Breakfast

7:50 Introduction

8:00 David Sousa, MD: ICU Liberation

Objectives:

- Become familiar with the Pain, Agitation, and Delirium guidelines
- Understand strategies to implement ABCDEF bundle
- Understand how the use a multidisciplinary approach to minimize the harmful effects of pain, agitation/sedation, delirium, immobility, and sleep disruption in the ICU

9:00 Christopher Stryker, MD: Volume-targeted ventilation in the neonate

Objectives:

- Provide a physiologic rationale for volume-targeting when using mechanical ventilation
- Review preclinical and clinical data on safety and efficacy of volume-targeted ventilation and evidence comparing volume-targeted with pressure-limited ventilation
- Understand the various volume-targeted modes on the newest generation SERVO-u and SERVO-n ventilators
- Provide practical tips on using volume-targeted ventilation, including ventilator set-up and settings, weaning and escalating support, trouble-shooting, and limitations

10:00 Break

10:15 Al Heuer, PhD, RRT, RPFT, FAARC: An Update on Infection Control for Our Respiratory Patients

Objectives:

- Provide a brief historical view of infection control practices
- Review the latest updates in infection control for our respiratory patients
- Provide additional resources relate to infection control

Schedule Continued

11:15 Manford Ayres, MPA and Michael Rice:

Keeping Everyone Safe: Hospital Security and Safety for Patients, Staff, Visitors

Objectives:

- Situational awareness in and around the Medical Center
- Review of code lockdown and active shooter
- Work place violence and de-escalation techniques for staff safety

12:15 Lunch & Exhibits

1:15 Sean Cullen, MA, LPC: Shot, Reverse Shot:

The Interaction Between Caregiving Professionals and Patients with Chronic Illnesses

Objectives:

- Review of the psychological aspects of a newly received diagnosis and ongoing chronic illness
- Review of the mood and anxiety components of the patient
- Recognizing and working with resistance.
- Recognizing care burnout

2:15 Regina M. Cariddi, MSN, RN: The Organ Donation Process: Saving Lives Through Organ Donation

Objectives:

- Identify the referral criteria for potential organ donation
- Describe the conditions of participation between the NJSN and the hospital
- List the two pathways to organ donation (brain death vs donation after cardiac death)
- Review the respiratory therapist's role in brain death determination and the apnea testing procedure
- Discuss the importance of effective, collaborative huddling with NJSN staff and medical staff to optimize donation possibility
- Summarizes the importance of clinical donor management guidelines related to potential lung donation

Evaluations & Certificate

Accreditation

Respiratory Therapists

Application for six (6) contact hours Continuing Respiratory Care Education (CRCE) credit.
American Association for Respiratory Care
9425 North MacArthur Boulevard, Suite 100
Irving, TX 75063

Registered Nurse

This program has been approved for 6 contact hours by the NJSNA.

Successful completion- criteria for awarding nursing contact hours:

- Participants must sign in
- Attend entire program
- Complete evaluation form
